

ABOUT ME

Driven by passion for software development and engineering, I have acquired proficiencies in various programming languages, including Java, Python, Golang, Rust, and more. Additionally, I have learned best practices for creating highly scalable software. Over more than nine years of experience, I have gained insights into delivering the best possible software with limited resources, enhancing quality and stability. This achievement has been made possible through knowledge of DevOps culture and cloud management.

SKILLS

Backend, Java, Golang, Python, Architecture, Devops.

Experience

Wallapop
Barcelona, April - 2025

Senior backend engineer

SEAT:CODE
Barcelona, Dec 2021 - Apr 2025

Senior backend engineer

As part of the OVS (backend) team, I participate in defining the architecture and cost control of the solutions provided, engaging at all levels of development/delivery.

- I actively contribute to the continuous improvement of the product, striving to offer a different perspective and proactively proposing solutions.
- In terms of dev experience, I seek to enhance processes within cultural values and empower users in management and technical proposals, facilitating communication at various levels.
- I actively participate in backend chapters to share and assess different experiences and promote best practices. Highlighting active and proactive collaboration across different teams to assist or support their developments

INCOM
Barcelona, Mar 2022 - May 2024

Technical Lead

As the first engineer, I work collaboratively with the board in defining and developing the platform.

- I develop the API and integrate it with key payment gateways.
- Cost control is implemented to minimize infrastructure expenses. It's worth noting the complete freedom and responsibility in the development of both the backend and the infrastructure as code supporting the APIs.

BLOOCK
Barcelona, Sep 2021 - Dec 2021

Lead Backend Engineer

As part of the backend team, I participated in the integration and improvement of the existing API and mentored a young, rapidly growing team.

DEXMA Energy Intelligence
Barcelona, Oct 2020 - Sept 2021

Senior Backend Software Engineer

Within the platform team, my main responsibilities included ensuring the stability of the platform and delivering new features. I developed integrations with IoT devices, implemented metric collection and analysis, and contributed to a high-throughput ingestion engine with real-time data-point calculations.

VERYCHIC
Barcelona, Ene 2018 - Oct 2020

Backend Software Engineer

As part and only backend, develop the API and data consolidation agents

- Development of a monolith with the SOLID principles as well as Hexagonal
- Development of AWS lambdas, for the collection of data necessary for business with batch processes
- Cloud management (manual), together with the development of batches in spring

GFI España
Barcelona, Sep 2014 - Jan 2018

Software Developer

- The Gfi Group is a multinational consulting, outsourcing and system integration company in information Technologies
- As a consulting company, I have developed for different clients.
- I have participated, from small projects to continuous delivery

Education

INSTITUT OBERT DE CATALUNYA (IOC)
2013

Técnico superior en desarrollo de aplicaciones multiplataforma

UNIVERSITAT OBERTA DE CATALUNYA
current

Engineer's degree
